Description

A user of Library Management Software is not able to renew the book which he/she has issued already. After adding more than 2 books in the issue Book category the application is getting crashed again and again.

STEPS TO REPRODUCE

1. Login to the library website with a valid credential.
2. Navigate to the Academic button in the menu and click on the Library management option.
3. Navigate the issued books button and click on the renew book option.
4. Add the books interested to renew.
5. Observe the results.

Exp Result: After adding more than 2 books the system should accept the request of adding books. And the user should renew the books successfully which she/he had issued already.

Actual Result: After adding books more than 2 books for the renew the system is getting crashed. And the user is not able to renew the issued books.
